ZERRIN BUCAKLI

LANDSCAPE ARCHITECT MS

YTU IS LANDSCAPE PLANNING, 1999

IUFF LANDSCAPE ARCHITECTURE, 1994

After completing her graduate studies at the Landscape Architecture of Istanbul University, she received a postgraduate degree in Landscape Planning from Yıldız Technical University. She contributed to Prof. Semra ATABAY's work at the 1996 Habitat Conference. She has been working 23 years in the private sector, mainly in the landscape executions, landscape project management, landscape design, including execution and management processes.

She has been actively involved in Quality Management Systems, Total Quality Management System installation and supervision activities.

She established ZB Landscape and she continues her professional works as ZB Landscape.

UYGULAMA NOTLARI:

1. Meydanı dolayan 2mt genişliğindeki bandın mevcut durumdaki eğimini düşürebilmek amacı ile; üst duvarın duvar üst kotundan itibaren, alt ve üst duvarlar arasında kalacak şekilde toprak tesviyesi yapılacaktır.
2. Bitki gösteri alanındaki bitkilerin dikimi esnasında, öncelikle bitki kuşaklarının dış konturları çizilecek şekilde dikim yapılacak daha sonra içerisi doldurulacaktır.
3. Meydanın sınırını belirleyen büyük ağaçlar, yeşil bandın orta aksına dikilecektir.
4. Meydanın sınırını belirleyen yeşil bandın alt kotundaki duvar boyunca, 0.50 mt ara ile sarmaşık dikilecektir.
5. Meydanın sınırını belirleyen alt ve üst duvarlar arasındaki şeve dikilecek olan abelyalar, şev yüzeyini kapatacak şekilde yatık dikilecektir.

4th International Green Roof Congress, Istanbul, Turkey

WHERE: Marmara / Turkey
WHEN: 20-21 April 2015

Where is there room for nature in towns? This is a question that is increasingly being asked by building experts around the world who are faced with the challenges of urban densification. Under the motto "Explore the Nature on Rooftops" successful solutions for sustainable urban development and practical Green Roof technology will be presented, discussed and taught at the 4th International Green Roof Congress as well as the latest achievements in science and technology. The congress programme will have a distinctly interactive style with lectures and workshops. Certified Green Roof experts, designers, landscape architects, landscape contractors, plant experts and delegates of municipal authorities will be sharing their knowledge and answering questions and queries in practice-oriented workshops.

More than half of the IGRC 2015 participants took the opportunity to climb the Zorlu Center Green Roofs. Tour commentary was provided via earphones.

The Zorlu Center venue, partial view of the 62,000 square meter roof gardens which rise to 33 meters above sea level. Photo Source and Copyright: Murat Germen.
